

# Systematic study of transparent conductors in the (zinc, gallium)-indium-tin oxide systems

George B. Palmer, Kenneth R. Poeppelmeier,  
Doreen D. Edwards, Thomas O. Mason

## **Abstract**

Bulk samples of transparent conducting oxides (TCOs) in the Zn-In-Sn and Ga-In-Sn oxide systems were prepd. by solid state processing. Phase relations and phys. properties were detd. and the results compared to similar measurements on thin film materials.
